2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or fairly suggest a semiconductor manufacturing apparatus comprising: a plasma generating device capable of generating a plasma; a first chamber for performing a plasma treatment on a first part of an object by the plasma therein under atmospheric pressure or approximate atmospheric pressure; a rail for sliding the plasma generating device, the rail provided in the first chamber; and an ink-jet device capable of applying a droplet to a second part of the object simultaneously with performing the plasma treatment, wherein the plasma generating device is provided in the first chamber, wherein the ink-jet device is provided in a second chamber; and wherein the object is level transferred (i.e. capable of being transferred horizontally) in the first chamber along a first direction and the plasma generating device is moved in the first chamber along the rail and along a second direction intersecting with the first direction in a direction parallel to a side of the object.
3. Further, no other prior art was located that fairly suggested the claimed invention in whole or in part, along with the requisite motivation for combination, to anticipate or render the claimed invention obvious.
